

FLOORING

CASE STUDY

Project:
**Galway Clinic
Galway**

Main Contractor:
John Sisk & Son Ltd

Flooring Contractor:
Larsen Contracts Ltd

Area:
1200 sq.m.

Products used:
**SLC 1500 Commercial
SLC 106 OPL
Dry4 Screed
DPM
HDS**

As part of the extension of two storeys to the Galway Clinic, Dry4 Screed was used to level out the existing roof level (soon to be 3rd storey). The product allowed application of an average of 65mm thickness over 1200m², which was covered with an application of 7mm SLC 1500 to allow seamless application of vinyl and linoleum floor coverings.

On the 4th storey, DPM was installed over the newly constructed concrete slab and covered with 3mm of SLC 106 OPL - a one pack latex levelling compound.

In order to create heavy duty ramps, HDS - an epoxy-based, trowel-applied resin - was used.
