

STREETSCAPE

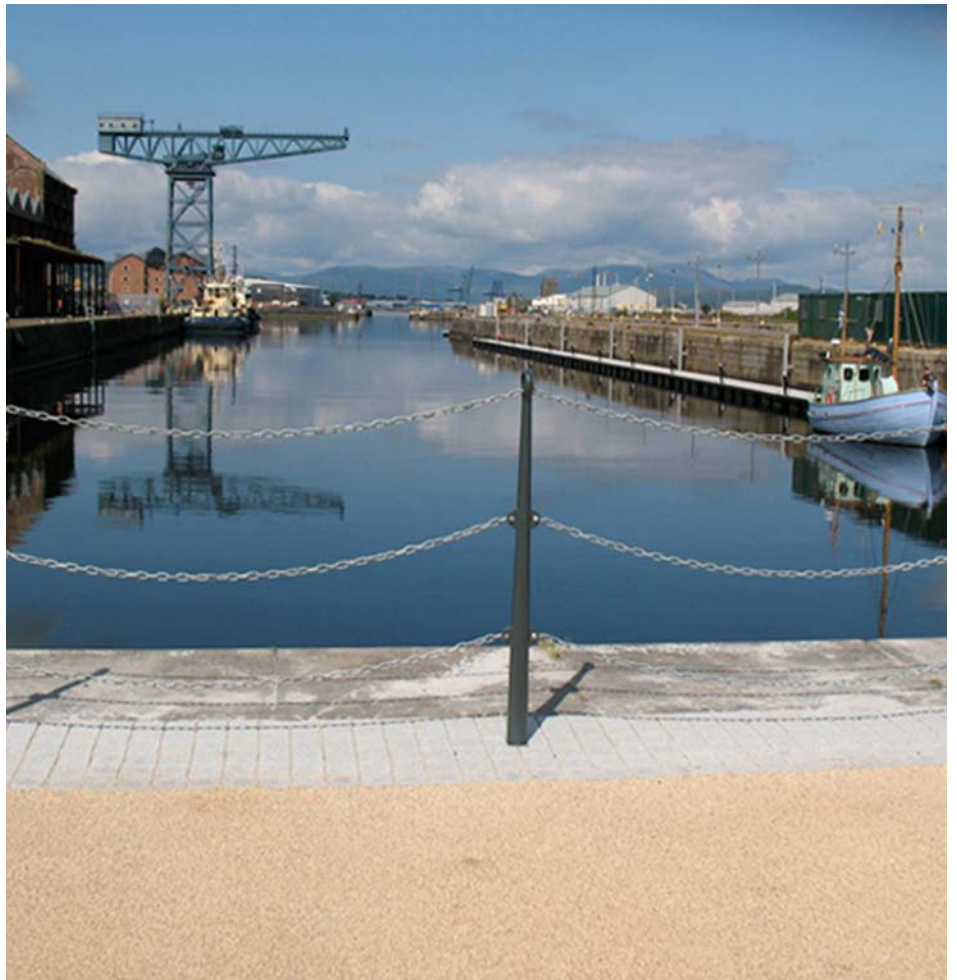

CASE STUDY

Project:
James Watt Dock

Main Contractor:
R J McLeod

Area:
27,000 sq.m.

Products used:
Larsen Streetscape Range

As part of the redevelopment of James Watt Dock, a new access road to the site was completed in July 2010, in time for the arrival of the Tall Ships. This provided sufficient roads traffic capacity for further redevelopment of the public realm.

The new £1.3M James Watt Square, located at the head of the dock, will be a focal point for wider development, including 1000+ new homes, retail, leisure and commercial units.

James Watt Square recognises the importance of Greenock's history and has incorporated it into the design of the site.

New berthing facilities were installed at James Watt Dock Marina, with associated pontoons and marina offices.
