

TILING

CASE STUDY

Project:
**John Lewis
Bluewater, Kent**

Tiling Contractor:
Colne Valley Tiling

Products used:
**Professional SLC 1550
Universal**

EU Primer

**Professional Flexible Fast
Set (C2FS1)**

**Professional Stain Resistant
Wide Joint Grout**

In 2009, Colne Valley Tiling were contracted to tile the new John Lewis store in the Bluewater Shopping Centre in Kent.

The existing concrete floor required levelling prior to tiling and due to the high footfall expected, it was decided to install the rapid-drying, fibre-reinforced Larsen Professional SLC 1550 Universal levelling screed onto a sand-scattered epoxy primer (EU Primer). This provided a well-bonded, stable, level base to accept the tiling after 24 hours.

The tiles were 20mm thick natural stone tiles which were fitted using Larsen Professional Flexible Fast Set (C2FS1) to ensure a strong bond in this high footfall store.

Finally, the tiles were grouted with Larsen Professional Stain Resistant Wide Joint Grout to help maintain easy to clean joints.
