

# ADMIXTURES

## CASE STUDY

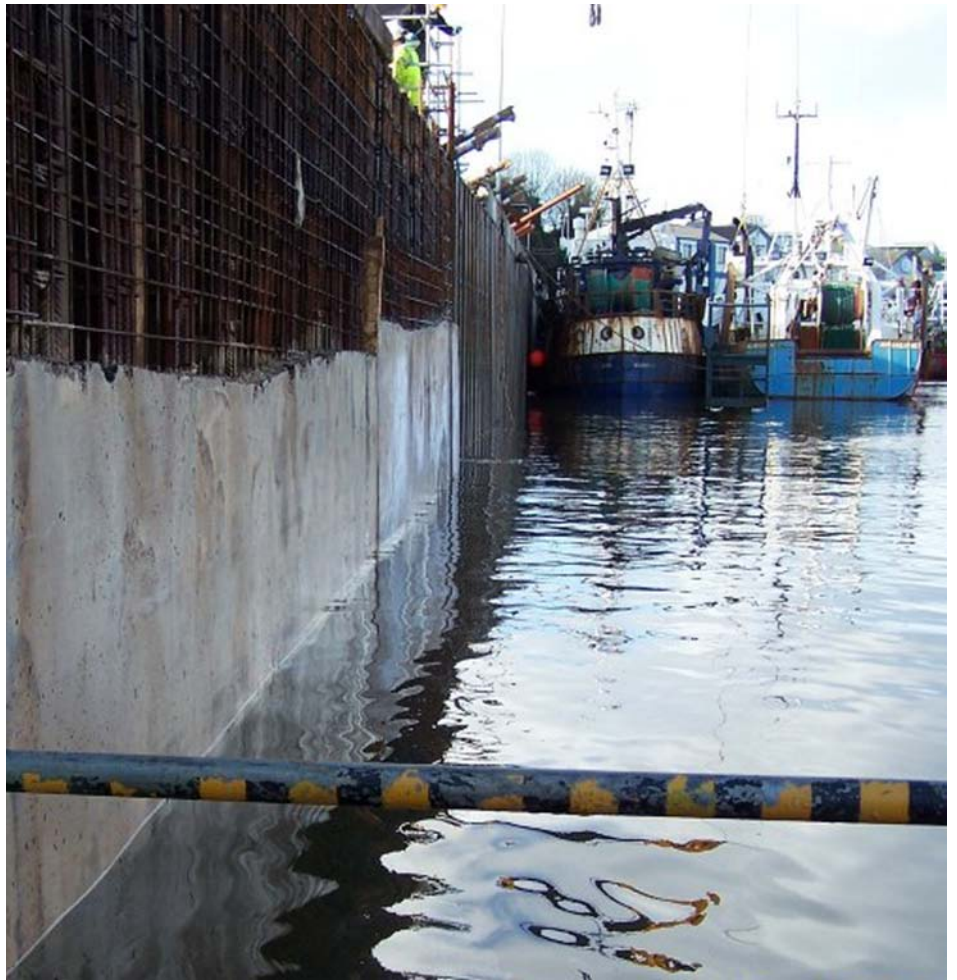

Project:  
**Underwater Concrete  
Kilkeel Harbour**

Main Contractor:  
**McLaughlin & Harvey**

Concrete Supplier:  
**Cemex**

Area:  
**2000 cu.m.**

Products used:  
**Chemcrete AWP  
Chemcrete CR800**

The harbour walls were being replaced with shuttered concrete walls as part of the modernisation of the fishing port.

Approximately half of the concrete is placed underwater, and as such, requires the use of Chemcrete AWP (anti-washout admixture) to enable the concrete to meet specification.

Due to the exposure class, the concrete also includes the use of a corrosion inhibitor - Chemcrete CR800.
