

# STREETSCAPE

## CASE STUDY

Project:  
**Moonraker Alley**  
**Great Suffolk Street**  
**London**

Main Contractor:  
**Mansell**

Client Architect:  
**Conran & Partners**

MAS Start on Site:  
**September 2011**

Products used:  
**Streetscape GPM**

The new development on Great Suffolk Street comprised of two buildings for student accommodation with commercial space on the ground floor.

The main block was formed using MAS F50 curtain wall to the ground level commercial space, Hueck unitised facade between the first and seventh floor levels (including brick slip cladding), a combination of aluminium rainscreen/MAS F50 curtain wall to the roof level pods and MAS W60 windows to the central light-wells.

The Delta block was formed using MAS F50 curtain wall to the ground level commercial space and Hueck unitised facade to the remainder.

In addition, McMullen also supplied bespoke balcony constructions within the façade package to both buildings.

Larsen supplied McMullen Architectural with a special, colour-matched Streetscape GPM to point the brick slip cladding.
