

TECHNICAL DATA SHEET

# **Felt Adhesive**

**EASY TO APPLY** 

**READY TO USE** 

**HEAVY DUTY** 

Felt Adhesive is a solvent-based, bituminous, heavy duty adhesive. It is ideal for bonding felt to timber, metal, concrete, asphalt, and felt roofs, seals, laps on roofing felt and can also be used as a dressing compound for chippings on flat roofs.

## TECHNICAL DATA SHEET

### **TECHNICAL DATA SHEET**

### PRODUCT INFORMATION

FORM	Viscous Liquid
COLOUR	Black
MATERIAL	Bitumen based adhesive
HAZARD INFORMATION	Flammable - Keep away from sources of ignition - no smoking. Use only in well ventilated areas. Avoid contact with eyes. Wash splashes off skin. Keep out of reach of children. Consult Safety Datasheet before use.
CLEANING	Clean tools, equipment etc. using white spirit or similar. Mechanical means are necessary when the product has set.
PACKAGING	2.5 L and 5 L paint tins
STORAGE CONDITIONS	Store in manufacturer's containers in a cool, dry, well ventilated and frost-free place.
SHELF LIFE	12 months in unopened manufacturer's packaging

### **TECHNICAL INFORMATION**

SERVICE TEMPERATURE	-30 to +60°C
FLASH POINT	38°C
DRYING TIME	~4hrs @ 20°C
COVERAGE	1.5 - 3.0 m2/L

### **DIRECTIONS FOR USE**

#### **PREPARATION**

Surfaces should be clean and dry. All traces of fungi, algae, moss, lichen etc should be removed with stiff brushing and the area treated with a solution of Larsen Concentrated Algicide and allowed to dry.

#### **PRIMING**

Concrete roofs should be primed with 4 parts of Larsen Felt Adhesive to 1 part White Spirit. Use approximately 1 L to 3m2 and allow to dry.

#### **APPLICATION**

Apply by stiff brush, mop or squeegee.

Apply the adhesive at 1 L per m2. Allow to dry tacky, typically after 15-30 minutes.

Apply felt to tacky film and roll to exclude air bubbles. Continue pressing the felt down to give maximum contact. Where possible the felt should be unrolled into the tacky film and rolled home with a light (25kg) roller.

Timber roofs should have the first layer of felt nailed down and following layers bonded with felt adhesive.

Edge laps should be at least 75mm (3") wide and end laps 150mm (6") wide - apply adhesive liberally to all overlaps.

#### RESTRICITONS

Solvent based - consult safety datasheet before use. Ensure adequate ventilation exists. Apply using standard industry methods and guidelines, e.g.BS COP 144:Part 3 1970, clause 4.6.

The information and recommendations above are given in good faith based on our current knowledge and experience of the products when properly stored, handled, and applied in accordance with current best practice, national standards, and our recommendations. As we have no control over site conditions or methods of application, no liability can be derived from the contents of this information sheet, or from any written recommendations, or from any other advice offered. The user of the product is solely responsible for the product's suitability for the intended application and is recommended to test the suitability prior to use. We reserve the right to change the properties of our products without notice. All orders are sold subject to our current terms of sale and delivery.
